

# Xerox® PhaserMatch® 5.0

## Color Management and Calibration Software for Phaser® 7800

For graphic artists and color professionals, color matching is a critical task. PhaserMatch 5.0 color management and calibration software adds another level of color control and helps maintain color accuracy.

- **Keep colors perfect.** Environmental conditions, such as temperature and humidity, affect a printer's ability to produce consistently accurate color. PhaserMatch calibration software quickly returns your printer to its factory-new settings. (Available with all Phaser® 7800 configurations.)
- **Emulate other devices.** Use PhaserMatch 5.0 to create custom color sets that emulate larger press equipment, allowing in-house creation of pre-press proofs. With PhaserMatch 5.0, you can quickly set/reset saved color profiles to keep your workflows efficient. (Standard on Phaser 7800GX configuration, optional on DN and DX configurations.)
- **Measure colors precisely.** Powered by industry-leader X-Rite, the PhaserMeter® color measurement device calibrates your monitor and the Phaser 7800 to match colors from swatch books or color tables, ensuring accurately matched screen-to-print colors. (Included with PhaserMatch 5.0.)

### PhaserMatch benefits include

- Get accurate, consistent results with professional-level color calibration
- Save time and money by controlling repeatable color
- Create fewer iterations of prepress proofs thanks to greater color accuracy that meets press color expectations

### System Requirements

#### Apple® Macintosh®

- Apple Power Macintosh computer
- Mac OS X 10.5.X, 10.6.X, and 10.7.X (with the latest update installed)
- 512 MB RAM required
- 1024 x 768 dpi resolution color monitor able to display thousands of colors
- Xerox Phaser 7800 color printer only
- Installation of the Xerox Phaser 7800 Macintosh printer driver (this driver must be used to utilize PhaserMatch 5.0)

#### Microsoft® Windows®

- Intel Pentium IV or AMD Athlon XP computer or better
- Windows XP 32 (with latest Service Pack installed), Microsoft Windows Vista 32 or 64 bit, or Windows 7, 32 or 64-bit (with latest Service Pack installed)
- 512 MB RAM required
- 1024 x 768 dpi resolution color monitor able to display thousands of colors
- Xerox Phaser 7800 color printer only
- Installation of the Xerox Phaser 7800 Windows printer driver (this driver must be used to utilize PhaserMatch 5.0)
