Challenge

In 2009 Raiffeisen Bank Slovenia decided to optimize their printing services. The optimization focused on reducing document output waste and costs through strict monitoring of printing, copying, and scanning operations. In addition to reducing waste and costs, Raiffeisen Bank Slovenia wanted increased document security and easier user interfaces. Since the bank had a clear hierarchical architecture, proposed solutions required central administration.

Solution

Y Soft SafeQ Professional Edition ensured:

- Accurate accounting for all dokument output -prints, copies, and scans.
- Centralized administration of the entire print environment through the Y Soft SafeQ central web interface.
- Secure document output via pull print and the Y Soft SafeQ Ultra Light terminal
- High output availability via Y Soft SafeQ follow me function allowing employees to collect prints from any Xerox device.
- Scan management via Y Soft SafeQ scan module. Users simply authenticate at the MFP and scanned jobs are sent to predefined email or folder.
- Customized reporting based on cost centers. Reports are sent automatically to cost center owners.

Benefits

- 30% reduction of printing volumes and associated costs
- move from expensive local printers to cost efficient MFPs service work gross
- Precise monitoring with exact number of printing operations divided into cost centers and even individual users.
- ROI of the solution under 1 and a half years
- Centralized structure and easy to use web interface, which makes the management and service of the whole printing network really easy and flexible

"In today's economic environment, cost cutting is a necessity. With Y Soft SafeQ and Xerox we print more economically and can apply the savings to improving our services to our clients."
