Xpert Billing® – The Cost Recovery Solution.

Challenge:

It's no secret that most businesses are constantly searching for cost-cutting measures. Recovering costs in the printing environment should be no exception.

Your company has a significant investment in its printer/copier device fleet. To recover printing costs and avoid needless revenue loss, you must have the ability to monitor and control the usage of each device. The ability to identify and assign values to cost factors – and to allocate accountability for charges – is critical for managing your company's cost control strategy.
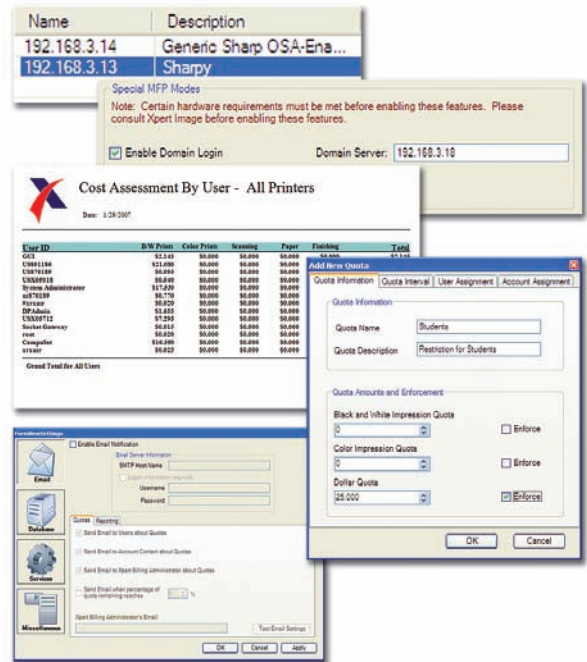

In order to recover printing costs, you need accurate data about the use of each device – data that enables you to track and control usage by departments, clients and employees.

Solution:

Xpert Billing Professional is the software solution that helps reduce the cost of operating your printer/copier devices. Xpert Billing enables you to track, control and manage device usage – and optimize cost recovery. With Xpert Billing you can identify cost sources and bill back those costs to departments, accounts, clients and employees.

Key Benefits:

- Manage Cost

- Get Up to Speed Quickly

- Get Detailed, User-friendly Reports

- Streamline Cost Recovery

Xpert Billing is your state-of-the-art solution for reducing the total cost of owning and operating your printer/copier fleet.

Gain Control of your Multifunction Devices

With Xpert Billing, users must be authenticated before making copies, prints or scans, enabling you to track and manage device usage. You can even set quotas based on impression count or a dollar amount and organize those quotas to conform to your company's billing cycle.

Manage Cost

Leveraging advances in job-based accounting technology, Xpert Billing stores comprehensive information about every job: prints, copies, scans and faxes. Xpert Billing is highly flexible, enabling you to charge back costs in a way that best suits your needs – from a simple per-page charge to detailed charges for special paper and finishing. And because not all devices are created equal, Xpert Billing enables you to assign different costs per page for different printers. In addition, Xpert Billing requires no special equipment, resulting in minimal start-up costs and low long-term maintenance expense.

Get Up to Speed Quickly

The Xpert Billing Professional solution is easy to install and implement, requires little training and has minimal impact on your company's day-to-day operations. And Xpert Billing requires no special equipment, enabling you to use your existing hardware, electrical and network connections.

Get Detailed, User-friendly Reports

Xpert Billing provides nearly 24 easy-to-read reports that help you optimize device usage. Reports contain detailed information such as:

• Which employees are printing and copying

• What the total cost per client is

Reports can be e-mailed directly to department heads, individual employees or the Xpert Billing administrator. Reports can also be printed or exported to a variety of traditional formats. For your company's special requirements, custom reports are also available.

Streamline Cost Recovery

Imagine having complete, central control of your company's entire printer/copier system – without the need for an additional cost-recovery terminal. Xpert Billing enables your company to capture and recover the cost of all copies, prints and scans – and provides user and charge number validation – all directly from the multifunction device panel.

Manage Production Printers Efficiently

Calculate what each department owes for production print jobs every month with the click of a button. Xpert Billing tracks detailed information for your black and white, highlight color, and full color production printers including impression count, paper used and finishing applied. By grouping the production printers under your "Production" cost table, you can specify different pricing than your Multifunction Devices thereby driving end user behavior.

Xerox Devices Supported

Multifunction Devices with Network Accounting
DocuSP controller
Fiery controller
Phaser Printers

Xpert Billing Solution requirements

PC with Windows 2000. XP Pro, or 2003
