Xerox Wide Format Solutions
## Better ways to take advantage of bigger opportunities.

It's time to widen the horizons of your business.

There's a whole great big world of opportunity out there. All you need to do is look around. From billboards and trade show signage, to architectural drawings and schematics, wide format applications are everywhere. In fact, wide format printing is one of the fastest growing segments due to the increase in wide format applications, with annual sales in excess of $20 billion.

The Xerox Wide Format Solutions Portfolio is as big as your plans for the future. We offer everything you need to produce the most in-demand wide format applications, starting with a wide range of colour and monochrome wide format printers that produce clear, eye-catching images on a variety of media.

Larger profits.

Sometimes bigger really is better. Especially when it comes to your profit margin. In most markets, you can price wide format outputs at 10 to 15 times the material costs of production. For in-plant customers, this equates to savings realised for doing the work in-house. That's the kind of margin that can make a huge difference in your profits.

Big-time versatility.

Our extensive wide format portfolio gives you the flexibility to make the most of your wide format opportunities. Beyond the choice of colour or monochrome, you can choose printers that produce applications for indoors, outdoors, or both. You'll be able to print on a wide array of substrates, from affordable vinyls to speciality-coated media on our colour printers and plain paper, film, and tracing paper on our monochrome printers. And you can choose from a variety of print speeds and paper sizes.

Greater opportunity.

There's a surging demand for wide format printed output. Every industry has wide format applications, from retailers to colleges and universities, government agencies to architects, trade show exhibitors to the hospitality industry, communications companies to contractors. Wide format applications make a bigger impact and get noticed.

Higher image quality.

When you're making this big of an impression, you want to make sure it's the best one possible. Our colour wide format printers use the latest technology – like Piezo-electric inkjets, Dynamic Variable Dot Imaging, and Intelligent Interweaving – to achieve spectacular results with every print run. Our monochrome wide format printers have the latest imaging technology to give maximum details, shading, and solids to every print.

The support you need.

A worldwide network of award-winning service professionals is always ready to help you make the most of your Xerox solution, and help you grow your business.

Build a profitable digital business from the ground up.

Our ProfitAccelerator® Digital Business Resource Collection is designed to help you succeed. So take advantage of these essential, easy-to-use guides:

- ProfitAccelerator Marketing Accelerator Kit
- ProfitAccelerator Open House/PR Kit
- ProfitAccelerator Wide Format Made Easy Kit

Make a big, bold, beautiful statement with Xerox Colour Wide Format Printers.

Delivering big-time impact both indoors and out. Most of today's growing wide format opportunities are in colour, with more retailers, companies, and organisations wanting to create more visually dynamic signage, displays, presentations, and other larger colour applications. We'll help you deliver them with wide format solutions that offer the best in image quality, durability, productivity, and affordability.

Xerox 8254E™
Colour Wide Format Printer

- Affordably print widths up to 1,371.5 mm (54 in.) high-quality images on a variety of substrates, including affordable uncoated media

- Prints at speeds of up to 13.54 m²/hr

- Durable Eco-Solvent Ultra CMYK inks are weatherproof and UV-stable for up to three years, making them ideal for indoor and outdoor applications

- The latest Piezo-electric inkjet technology and Eco-Solvent inks produce more vibrant colours on indoor and outdoor signage

- Intelligent Interweaving Print Technology, Dynamic Variable Dot Imaging, and printing up to 1440 dpi produce photo-quality images while minimising banding and mottling

- A take-up roll and automated self-maintenance systems minimise operator intervention, helping maximise productivity

Xerox 8264E™
Colour Wide Format Printer

- Prints widths up to 1,615.44 mm (63.6 in.) at up to 16 m²/hr for faster turnarounds

- Produces high-quality images on indoor and outdoor media ranging from affordable uncoated PVC to more costly coated materials

- New Eco-Solvent Ultra inks are weatherproof and UV-stable up to three years, as well as highly resistant to scratching, smearing, and cracking

- Advanced Piezo-electric inkjet technology inks enable more vibrant colours and a greater colour gamut

- Intelligent Interweaving Print Technology, Dynamic Variable Dot Imaging Technology, and Piezo-electric Drop-on-Demand inkjet heads let you print sharp images using less ink than with fixed-dot inkjet systems

- Automated self-maintenance systems and an optional motorised winder/unwinder keep operator intervention to a minimum

Xerox 8265™/8290™
**Colour Wide Format Printer**

- Prints on a wide range of indoor and outdoor media, from low-cost uncoated vinyl to high-quality coated media up to 2,280 mm (89.76 in.) wide

- High-quality production speeds ranging up to 24 m²/hr

- Latest Piezo-electric Drop-on-Demand inkjet heads with 360 nozzle heads per ink channel deliver higher firing frequencies for faster print speeds

- Easy handling and loading of bulk media rolls with standard motorised winder/unwinder system

- Automated onboard self-maintenance and ultra eco-solvent ink systems require minimal operator intervention

- Eight ink channels with four- or six-colour ink set choices – four-colour printing doubles the number of print heads per colour and increases printer productivity without compromising quality

- Dynamic Variable Dot Size Technology enables lower ink usage and economical high-quality prints

Versatility meets affordability.

Great performance leads to big returns.

Versatility inside and out.

Xerox Colour Wide Format Printers give you the ability to print a wide range of high-impact indoor and outdoor applications:

- Point-of-purchase displays
- Billboards
- Banners, posters, and signs
- Exhibition graphics
- Presentation graphics
- Long-term back-lit displays
- Vehicle graphics
- Wall murals
- Street furniture
- Flags

Xerox 8365™/8390™
Colour Wide Format Printer

- Dynamic Variable Dot Size Technology enables superior image quality on a variety of affordable or specialty media up to 2,280mm (89.76in) widths and delivers lower ink usage versus fixed-dot inkjet technology

- Designed for unattended printing environments at production-level speeds with a standard motorised winder/unwinder system and bulk media rolls

- Superior image quality and durability for outdoor applications with long-lasting mild-solvent inks that are scratch-resistant and UV-stable for up to four years without protection

- Reliable Piezo-electric Drop-on-Demand inkjet heads for maximum productivity

- Minimal operator maintenance thanks to mild-solvent ink systems and automated onboard self-maintenance

- Eight ink channels with four-colour printing doubles the number of print heads per colour and increases printer productivity without compromising quality

Xerox 7880/9880™
High quality printing for indoor applications

The 44" 9880 and 24" 7880 from Epson take larger format printing to new levels of quality, stability and consistency. Epson UltraChrome™ K3 ink with Vivid Magenta technology, and combine superb results with improved productivity.

- Wide format colour printing system designed for the highest print quality in the semi-production environment

- Provides unmatched productivity for wide format colour document production operation by reducing turnaround on every job

- Produces wide format colour images at exceptional speed – the highest quality images with the combination of high colour gamut and durability

- Offers the business advantages of one machine for a wide range of colour applications, poster printing to fine art reproduction

Xerox 11880
The world's first true high-quality wide-format printer

The 11880 from Epson produces the ultimate in colour and black and white up to 64". Transform your print quality with Epson's latest breakthrough in inkjet printing, the Epson Micro Piezo TFP™ print head.

- Epson's first true wide-format printer with the highest quality

- Discover the revolutionary new Epson Micro Piezo TFP print head

- Epson UltraChrome K3 ink with Vivid Magenta technology for superb colour

- Enhanced productivity with speed, reliability and ease of use

Productive. Durable. Dependable.

Superb, repeatable, long-lasting results

Superb, repeatable, long-lasting results

Make big improvements in your productivity with Xerox Wide Format Solutions for CAD and GIS applications.

Clearly focused on superior performance. Our monochrome wide format solutions are designed to improve the efficiency of all kinds of CAD environments while delivering outstanding image quality, durability, and low cost of operation. These printing, scanning, and copying solutions are modular and can be configured for big projects, small jobs, and everything in between. And you can upgrade at any time — without changing equipment, without the need for a technician visit — thanks to our innovative Software Feature Keys.

Xerox 6204™
Wide Format Solution

- Prints up to 4 or 5 A1 per minute — all with outstanding 600 x 600 dpi image quality
- Delivers big productivity in a small footprint that fits virtually anywhere
- Scans complex documents into electronic formats with clean-up capabilities
- Supports a variety of copying requirements — including collated sets — with nine levels of copy density to choose from
- Intuitive menus make the 6204 easy to use with only minimal training

Xerox 6279™
Wide Format Printer

- Prints up to 7 or 9 A1-size prints per minute and scans up to 152.4 mm/sec (6 ips), with optional on-board scanner while printing
- 600 x 600 dpi printing and optional colour-capable scanners enable colour workflows and deliver sharp, precise detail — print after print
- Holds up to four rolls of plain paper, tracing paper, or film for uninterrupted printing and unmatched media flexibility
- New, intuitive colour user interface makes the 6279 easier to use than ever
- Scan-to-mailbox, FTP, or remote printer options available for added functionality

Xerox 721™
Wide Format Print System

- Handles high volumes with a lower cost of ownership at speeds up to 22 A1-size prints per minute
- Offers 400 x 400 dpi print resolution with outstanding greyscale renderings in 256 levels
- Software Feature Keys enable easy on-site upgrades at any time, without replacing equipment
- Single-component toner system creates zero waste, increasing equipment reliability and providing exceptional toner yields
- Optional Wide Format Scan System provides full multifunction support: printing, copying, full-colour scan-to-file, and scan-to-print

The ideal fit for small spaces and big projects.

Big-time productivity and flexibility.

Do more and do it better.

Make big improvements in your productivity with Xerox Monochrome Wide Format Solutions.

Xerox 7142 colour printer™
High speed colour printing for CAD and GIS applications

Low total cost of operation, impressive speed and consistent high quality. The Xerox 7142 Wide Format Printer is designed to make your job easier and your office more productive. For busy, service-minded CAD or GIS environments like yours, it's the perfect fit. High speed printing for CAD/GIS applications

- Maximises productivity – prints A1-size in as little as 44 seconds, and can run unattended with a paper roll of up to 150 metres

- Impressive image quality – excellent fine lines, continuous tones, and solid colours

- Competitive total cost of ownership – save money over market competitors on ink and media costs per square metre

Xerox Wide Format Q-Indexer
Unparallel scanning and indexing productivity

Whether you start with hard copy or digital documents, creating a useful electronic archive means recording all the details of each document that you may wish to search for later. For more advanced archives you may also wish to capture further information for statistical purposes all this is possible with Q-Indexer.

Q-Indexer brings you a unique combination of speed and flexibility with unmatched ease of use. Developed to cope with large volumes of documents, Q-Indexer allows you to view, quality check and index in one easy step.

Xerox Wide Format Docuwide Qcontrol
Powerful queue management control

Qcontrol is a powerful and easy to use application that adds a new dynamic to the productivity and versatility of Xerox Wide Format devices.

Qcontrol complements the processing power of the Accxes controller whilst satisfying the demands of a busy print environment with the simple convenience obtained from queue management.

Quite simply, Qcontrol provides an interface to view, control and route print jobs. The print queue can be used in manual or automatic mode, and jobs can be stored for later reprints. Without the need of a dedicated PC1, Qcontrol is implemented with the minimum of fuss. Its simple operation means benefits are quickly realised.

Superb, repeatable, long-lasting results

Xerox Wide Format Scan System

Our Wide Format Scan System is designed to easily adapt to your changing needs, with variable speed capabilities that accelerate your workflow. By giving you the ability to concurrently scan and print, you can save hours over the life of a project. You'll also be able to take advantage of:

- Paper handling for sizes up to 30.5 m (100 ft) long, 1,066.8 mm (42 in.) wide, and 12.7 mm (0.5 in.) thick

- Copy speeds from 50.8 mm/sec (2 ips) to 101.6 mm/sec (4 ips) and scan speeds up to 203.2 mm/sec (8 ips)

- Optical resolution of 600 x 600 dpi

- Outstanding colour and gradient recognition for incredibly sharp greyscale images

- Scan-to-net and copying capabilities, with a full-colour scanning upgrade available

Xerox 7450/9450™
High Speed Printing for indoor applications

The 44" 9450 and 24" 7450 from Epson give you a high level of productivity with all of the quality you expect from Epson technology, it is ideal for use in POS, CAD, GIS applications. You can rely on professional quality results every time on the widest range of media.
- High speed wide format colour printing system for four colour applications

- Produces wide format colour images at exceptional speed – with the combination of high colour gamut and outdoor durability

- Provides unmatched productivity for wide format colour document production operation by reducing turnaround on every job

- Dual four colour ink system allowing one machine for a wide range of colour applications, from poster printing to CAD drawings

Get the solution you need to meet a wide array of demanding applications:

- Architectural or construction plans
- Architectural or engineering renderings
- Electrical diagrams (e.g., wiring)
- Schematics
- Mechanical 2D and 3D
- Solids modelling
- Seismic
- Scientific/Medical
- Very low cost signage
- GIS/Mapping and posters

The power to do twice as much.

Superb, repeatable, long-lasting results

Make sure your wide format print operation is living up to its full potential.

Get more performance, productivity, and profitability out of your monochrome wide format production with the Xerox FreeFlow® Accxes® Print Server.

Easy to learn.

With the FreeFlow Accxes Print Server, the operating system is completely hidden, so there's no need to deal with a graphical or command line interface. Everything can be done using the Web Printer Management Tool, Accxes Client Tools, or the copier user interface.

Highly secure.

The FreeFlow Accxes Print Server provides enhanced security for your files thanks to a built-in firewall, its Linux® operating system, and optional capabilities such as three-pass image overwrite feature and removable hard drive.

More productive.

With select options, get the power of concurrent print, copy, and scan-to-file. Plus, InstantAccxes enables hot folders to automate workflows, while TotalAccxes allows users to scan in colour jobs and print them on a colour network printer.

Easily updatable.

The FreeFlow Accxes Print Server makes it easy to upgrade to new features and higher performance. Instead of buying new hardware, you can just download new features, often at no cost. It also eliminates the need to schedule a service call for upgrades, except for major changes such as adding an additional printer, scanner, or new operating system.
