## > Authentication

Leverage your existing single sign-on infrastructure by allowing users to log in with the same username and password used elsewhere on the network. No need to remember and maintain multiple logins!

- Integrate with:

    - Microsoft Active Directory

    - Apple Open Directory

    - Novell eDirectory

    - Other LDAP, NIS or POSIX environments

- Optionally authenticate using HID proximity cards with Network Readers Xerox® Devices built on Xerox® ConnectKey® Technology

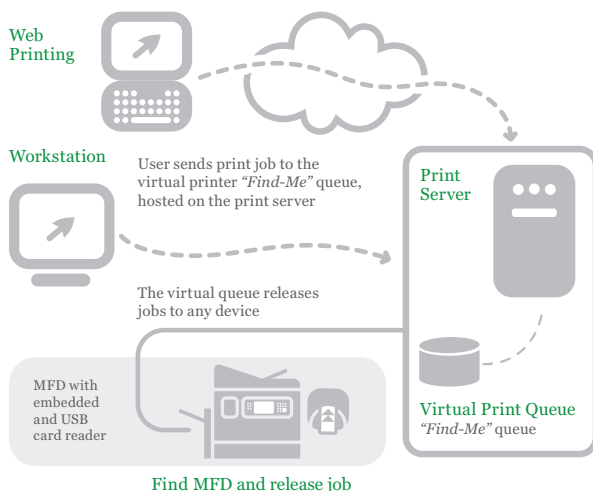

Xerox Network Accounting Authentication Window

Optional Authentication Window when using HID Card.

## > Follow Me and Secure Print

Web Printing

Workstation

User sends print job to the virtual printer *"Find-Me"* queue, hosted on the print server

The virtual queue releases jobs to any device

MFD with embedded and USB card reader

Find MFD and release job

Print Server

Virtual Print Queue
*"Find-Me"* queue

*A global print queue provides convenience for end users and helps keep documents secure*

Only available on Xerox® Devices built on Xerox® ConnectKey® 1.5 Technology and higher and optionally Card ID Authentication. Find Me printing provides users with the option to use any multi-function device, an environment where users send the jobs to a single virtual global queue, then walk up and log on to any Xerox® Multifunction Printers to release individual print jobs.

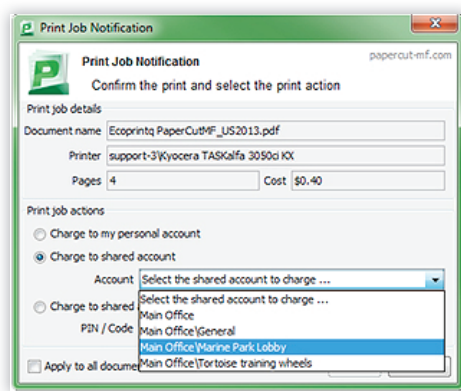

| Document Name | Pages | Cost |
|---|---|---|
| Email - Mozilla Firefox | 86 | $17.20 |
| Making the perfect coffee | 34 | $6.80 |
| http://slashdot.org/ | 58 | $11.60 |
| http://slashdot.org/ | 57 | $11.40 |

## Powered by PaperCut
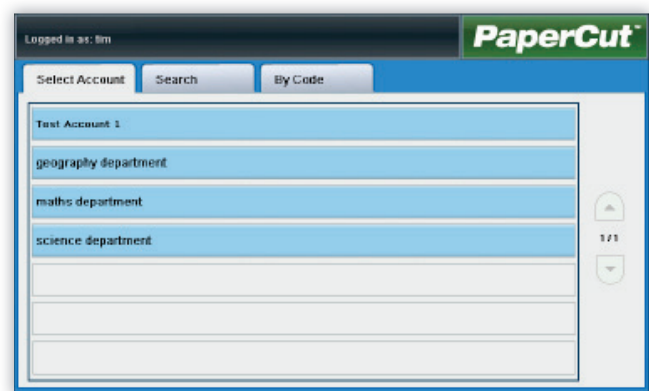

## › Flexibility to Charge Accounts

The embedded copier interface is consistent with the workstation print interface, meaning users only have to learn one system and one set of terminology. Jobs may be allocated to shared accounts that represent departments, projects or clients.

If enabled, shared/dept./client accounts can be accessed via:

- Quick entry via Account code/PIN
- Search by Account Code and Name (Xerox® Devices built on Xerox® ConnectKey® 1.5 Technology and higher)

Charging to a share account while printing from a workstation

Charging to a share account while copying
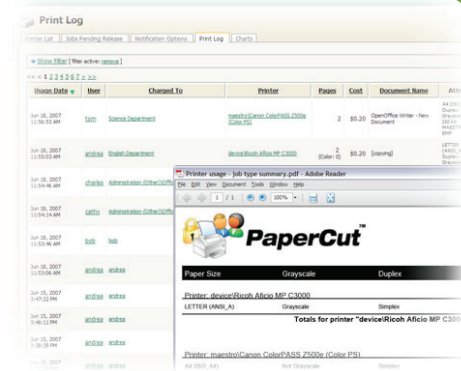

## › Track and Control Copy/Scanning/Faxing

- After authenticating with their user account, users select the account to charge for their copies/fax/scan.
- Users are provided with real-time feedback of account balance and cost as the job proceeds
- Charge different types of copying at different rates
- Restrict access to color copying
- All usage reported centrally in the PaperCut logs
- Optionally apply quotas to limit usage/amount of copies/scan/fax.

## › Consolidated Reporting

Consolidated management and reporting in either summary or detailed formats are readily available at the click of a button for all copies and prints across your entire fleet:

- By device (printers & copiers)
- By user
- By shared account (client, department, faculty)
- By location
- By date and time / period
- By environmental impact

## › Supported Devices

**Xerox® Devices built on Xerox® ConnectKey® 1.5 Technology and higher**

- ColorQube 8700/8900
- ColorQube 9201/9202/9203
- ColorQube 9301/9302/9303
- Xerox Color 550/560
- Xerox D95/D110/D125
- WorkCentre 5135/5150
- WorkCentre 5325/5330/5335
