INFORMATION **EXCHANGE**

The Online Fax Service is a smart global hosted service which lets you send faxes directly from your Xerox MFPs and email, and receive faxes in your email.

All the benefits of a fax server without the server

There's an increasing need to incorporate fax traffic into digital work-flows and processes. Fax remains an important – often mission critical – means of communication. Its importance is in no way diminishing (Gartner, 2008).

All of your in- and outbound fax traffic is digitized with The Online Fax Service. The power and legal significance of fax become part of your digital workflow. Keep your existing fax number and realize significant cost savings thanks to modern technology and the Fax Credit Bundles.
